

# AIDS

## WHATEVER YOU THINK, THINK OPPOSITE!

*'Endless loop - n. See loop, endless. Loop, endless - n. See endless loop.'* **Isaac Asimov**

In looking at the story of AIDS, we will do so in an unfolding manner, and again I will endeavour to be as succinct as possible as I condense what could easily be a book all in itself. We'll begin with the triumphant worldwide announcement the AIDS virus had been identified, we'll then look at how AIDS was being sold to us in the early days, we'll then look at the hidden 'infectious AIDS' Big Pharma influencers at the time, we'll look at what the AIDS illness really is, we'll look at the nature of the drugs being sold back then and today to help 'battle' the alleged virus, we'll look at 'the fashion' of AIDS, we'll look at how we all played our part to 'help' Africa, and lastly we'll look at the devastating consequences of us all getting on board the worldwide AIDS train and not carrying out our simple due diligence before boarding.

## THE ANNOUNCEMENT

It was the 23<sup>rd</sup> April 1984 and the National Academy of Sciences auditorium in Washington DC was packed with journalists and television crews abuzz with anticipation. US Health Secretary Margaret Heckler emerged and greeted the assembled throng, declaring: *'Today we add another miracle to the long honour roll of American medicine and science. Today's discovery represents the triumph of science over a dreaded disease.'*

The miracle Heckler announced was that a team of virologists led by Dr Robert Gallo had apparently isolated a virus that was the probable cause of AIDS, aka Acquired Immune Deficiency Syndrome. This was a tremendous announcement at the time, and the enormity of Heckler's words, coming at a time when our fear of AIDS was at its height, could not be over-estimated. Describing Gallo's work as an all-American miracle discovery, Heckler reminded the public of the gratitude it owed to medicine for triumphing over this dreaded disease. And then it was the turn of Dr Gallo. Dr Gallo! Dr Gallo! This way! This way! chorused the hordes. The whirring and flashing seemed more befitting a royal arrival, the jostling photographers all vying for that special Gallo victory shot that would accompany next day's triumphant world headlines which would announce 'The Beginning of the End of the Scourge of AIDS!'

Gallo produced what he described as 'photographic evidence' of the cornered virus (later to become known as HIV or Human Immuno-deficiency Virus) and he briefly outlined the supporting science so-called behind his discovery. And all the time, the flashing and the whirring, but with no challenging question asked of him by anybody, no asking why the virus had been announced as the 'probable' cause of AIDS and not the definite cause of AIDS. What a ridiculous question! Robert Gallo was a virologist for goodness' sake! He said the virus had been identified, and so that was that, and as a result, this relatively unknown doctor was now being fêted as the saviour of the human race, quite literally!

A few months later, kurrent King Kong c19 slippery snake Anthony Fauci would be put in charge of the US National Institute of Allergy and Infectious Diseases (NIAID) to help 'plan a way through the AIDS crisis'. Said Fauci at the time, *'I don't think AIDS research is heading in the right direction.'* More evil tennis then ensued as the newly-appointed Anthony Fauci very publicly began urging the pharmaceutical industry to come up with a life-saving AIDS drug as soon as possible! Fauci would also foster very good links with AIDS activist Larry Kramer who would lead groups of up to 100 'angry protestors' to storm such places as the FDA, the New York Stock Exchange and St Patrick's Cathedral to 'protest' at

the governments intransigence on 'fighting' AIDS and baying for Burroughs Wellcome to lower the price of her AIDS drugs - all these protests of course 'somehow managing' to find their way onto [primetime](#) TV. Find a primetime AIDS cure NOW! Funny, that.

Yet, when 35,000-plus people gathered at Trafalgar Square in September 2020 and over 1,000,000 in 2021 to protest against the inhumane c19 lockdown laws and the fake c19 pandemic, NOT A SINGLE SECOND was devoted to the protests ANYWHERE on primetime TV, other than to denounce the ant-vaxxers for their irresponsible behaviour, and being careful to not show a single panoramic shot of the massive crowds. Funny, that too. We'll get to the murderous Burroughs-Wellcome 'AIDS cure' in a few minutes.

Fauci would later reflect on his dear friend Larry's [passing](#). How touching Anthony! But remember, you're reading everything, everything, EVERYTHING as a dissenter now. We must read between the lines, and when we do, the parallels between AIDS and King Kong Korona plandemic are beyond coincidental.

Right, we see Robert Gallo and Margaret Heckler at the 1984 press conference announcing 'the probable' cause of AIDS. And below that, we see Anthony Fauci as new head of NIAID drawing up some magical pictures of Gallo's possible, hypothetical, never isolated, probable, likely, maybe, never proven, never identified, \$multi-multi-billion AIDS 'virus'. But for many scientists and doctors at the time, Gallo's announcement didn't sit well at all. In their eyes, Gallo and the vast media frenzy supporting him had broken with all ethical science protocol.

AIDS critic David Rasnick stated in Spin Magazine: *'With that announcement, Gallo had publicly leap-frogged right across the scientific process - across peer-*

*review and analysis, across the very checks and balances of science.'*<sup>1</sup> And a Dr Joseph Sonnabend, a South African physician and AIDS researcher, had this to say about the science of AIDS and the drug AZT prescribed to 'cure it', *'It is beyond belief. I don't know what to do. I'm ashamed of my colleagues. I'm embarrassed. This is such shoddy science. It's hard to believe nobody's protesting. Damned cowards!*

*The name of the game is to protect your grants. Don't open your mouth. It's all about money. It's grounds for just following the party line and not being critical when there are obvious financial and political forces driving this.'*<sup>2</sup> And we'll be looking at the drug AZT and the package insert shortly.

In the eyes of the science purists, Gallo had committed a scientific no-no. He had announced the probable cause of AIDS but allowed nobody to verify his claims. Basically, Robert Gallo's AIDS virus carried the same weight as Dean Hamer's gay gene. How very different the future of AIDS/HIV might have been had Margaret Heckler opened that first AIDS press conference by reading out the following text from a paper on how to conduct ethical scientific research, *'Science and research must be studied in the context of all the interested parties involved. The questions centre on determining the relative weight of the various allies in the 'fact-creating' process - e.g. funding bodies, businesses, departments of state, professions and other scientists. In analysing scientific debates, one should always ask what social, institutional, political and philosophical interests lie behind often apparently 'neutral' and 'technical' knowledge claims.'*<sup>3</sup>

My goodness! Imagine how many so-called sciences today would crash and burn if we applied the same rule of thumb! Once again, we will discover now how the social, institutional, political and philosophical interests driving the AIDS pantomime had been [expertly hidden from us](#), and how the apparently 'neutral' and 'technical' knowledge claims being made by the conventional AIDS 'scientific experts' mirror the crafty announcements being made by today's lying and conniving c19 'scientific experts'.

## HOW AIDS WAS SOLD TO US

The 'Blanket AIDS Terror Campaign' began in the UK and in the rest of the developed world all at the same time. The UK campaign began in earnest with a series of full-page adverts appearing in all the UK daily newspapers across March and April 1986 warning us of the new virus killer. Laughably, the advert began, *'If AIDS only affects 0.002% of the population, why is this advertisement appearing in every national daily newspaper?'*

That's an easy one for us now. The adverts appeared in all the newspapers firstly because the kings of the earth own all the newspapers and secondly, how else were the kings going to kick-start their next pharma-terror campaign? The advert stated there is no known cure for AIDS (OMG! Please do what you can to save us!), that it spreads through sexual contact (OMG x 2), through intravenous drug use (OMG x 3) and particularly affects the homosexual community (OMG x 1,000) , and that penetrative sex is high risk and should be avoided.

In highlighting the 'homosexual' and the 'penetrative' factor, the source of AIDS was now firmly established in the people's minds as a queer plague, a fag plague, a gay plague, and 'infected queers', fear of gay plumbers and gay dentists and gay everything would set the tone for years to come, regardless of the fact AIDS never was a gay plague and neither is AIDS an 'infectious disease' as we'll discover.

### I USED THE TERM DEVELOPED WORLD

But full marks again to Madame Mainstream for cementing in our minds AIDS is a killer virus spread predominantly by dirty homosexuals. Our scare-mongering CORONA headlines today mirror the AIDS headlines of 30 years ago. **CORONAVIRUS WILL PUT 8M IN HOSPITAL**, warned junior pole-dancer [Dahlia Spress](#) at the beginning of the King Kong pantomime.

And you may have noticed just now the term 'developed world'. If you did, what so-called 'developed' countries came to mind when you read that? Or maybe you didn't notice, such is the frequency with which the term 'developed world' is used, and I'll be using this term from time to time in this chapter, as well as 'first world' and 'third world' and I'll be doing so in the hope I can illustrate a point dear to my heart. As we consider all that we've read so far in Smoke and Mirrors, we should ask ourselves how our God might be viewing all of our 'developed world' activities and the respectable philanthropy this 'first world' delivers to various 'third world' countries. I'm hoping we'll begin to see the despicable irony in these terms and that by the end of this chapter we would be shamed to such a degree that we would never EVER AGAIN use any of those

terms in any of our conversations. First world, smh. Who do we think we are! All of us equal under God's gaze, except we 'over here' are just a little bit more equal, a little bit more developed? Really? And who's doing the measuring under God's gaze? Ugh x fifteen million!

This first round of early AIDS newspaper adverts, said the UK government was prompted by growing concerns over a strange new wasting disease first reported on the east and west coast of America in the late 1970s which, a few years later, now also seemed to be affecting parts of Africa.

Onwards to the mid-80s, and this new 'disease' was now also appearing in various European cities including London. Adding together all of these supposed 'pandemic pointers', the UK CMO at the time Donald Acheson (deceased 2010) felt duty-bound to report his concerns to his superiors. Said Acheson, *'I was horrified. If this could happen in Africa what would an identical virus do in Britain? I sought an urgent appointment with my political boss, Norman Fowler.'*

[Page 11](#) Of course you did, Donald, of course you did!

At the same time, Acheson also sent a letter to every GP in the country instructing them to be on the lookout for this 'terrible new disease'. Leaflets were distributed to all UK surgeries warning haemophiliacs and blood donors to take precautions because of the potential for 'AIDS-infected' blood supplies. Do you older ones remember the 'AIDS-infected blood bank' headlines?

Just as Madame Mainstream has been painting a catastrophic picture over the last 2 years of a world engulfed by 'infectious King Kong c19', so too she saw to it a worldwide 'infectious AIDS' juggernaut gathered the same momentum. I told you we'd be climbing the walls a lot quicker, didn't I! We can immediately

imagine those AIDS headlines now, and the malevolent forces driving them, even if we're not old enough to remember them.

## **SCARING PEOPLE WAS DELIBERATE**

Despite all the scare-mongering and the full-page adverts, this still had not produced the desired levels of national anxiety. That was to come though as the Fowler/Acheson/Big Pharma AIDS task force moved on to phase 2 of 'Operation Blanket AIDS Terror'. On 21<sup>st</sup> November 1986, Health Minister Norman Fowler announced in the House *'From this Sunday there will be a further intensive round of newspaper advertising lasting over the week - the fifth round of such advertisements; that will be backed up by a general poster campaign, with posters appearing in 1,500 sites around the country; shortly after that there will be a youth campaign, using magazines, radio and cinema; early in the new year there will be a leaflet drop to all 23 million households in this country accompanied by television and radio advertising to maximise its effect; the HEC leaflet 'Don't Aid AIDS' will be sent to 11,000 pharmacies where members of the public [can get them free.](#)'*

It was time now to roll out the scary TV adverts, and through every possible media outlet available! In February 1987, two short but dramatic doom and gloom AIDS adverts appeared, Iceberg and Monolith. The iceberg theme tried to convey the idea of something unseen and far bigger lurking just below the surface. The advert begins with an icy wind and the words *'There is now a [deadly virus.](#)'*

For us oldies however, the advert we all remember is Monolith. Also known as Tombstone, Monolith was narrated by John Hurt and contained all the underlying fear and destruction you could wish for in a forty-six second SEX VIRUS ALERT! Amidst volcanic eruptions and falling rock faces and falling tombstones, John tells us AIDS is now a deadly disease with no known cure, anyone can get it and if you ignore the leaflet when it arrives through your door, it could be [the death of you.](#)

The client for Iceberg and Monolith was the UK Central Office of Information aka COI - similar to the US Office of War Information and Nelson Poynter's deceitful US Information Agency which produced those WW2 'victory shorts'.

Sci-fi film director Nic Roeg was chosen to direct the ads and the ad agency chosen to joint-manage the project with COI was TBWA which had already worked with government on a nursing recruitment drive, a rubella vaccine campaign and a couple of hard-hitting anti-heroin shorts. Malcolm Gaskin, the creative director at TBWA at the time says of *Monolith*, *'Scaring people was deliberate. The director Nic Roeg was specifically chosen for his doom and gloom sci-fi aesthetic. It starts with a volcano because it's about the end of the world. Originally it was even scarier: we had metallic sirens blaring like the beginning of a nuclear war. But Thatcher thought we were over-dramatizing it and she was probably right. If we'd kept it like that I think everyone would have [headed for the beaches](#).*' Below, we see more of the same King Kong Korona headlines from 35 years ago. Oh, I do beg your pardon! I meant AIDS, smh.

To oversee the £20Mplus campaign, Norman Fowler appointed exWW2 tank commander Willie Whitelaw to head up the early AIDS task force. Leader of The House of Lords at the time, Whitelaw stated he knew all about sexual diseases and that advising his troops on 'keeping clean' had been one of his regimental responsibilities. And by golly, we all exclaimed, we need a sexual diseases expert at the helm right now! And we need Willie right now because thousands of us were now 'infected' with the deadly AIDS virus because that's what the incessant TV adverts and mainstream news reports were telling us. So, we must all be infected! Is a depressingly familiar picture beginning to emerge here?

The adverts were also screened in every cinema and reproduced in almost all teen magazines. At the same time in other first world countries, similar AIDS

DEATH adverts appeared. Germany adopted the 'friendly, worldly-wise, next door neighbour down at the pub'-type approach. In this advert, the old man sighs knowingly as he watches a lad across the room with [wandering hand trouble](#) and he begins lecturing us on where all of this 'deadly friskiness' is headed. We can be also be infected and not even know it! Now there's a surprising message, smh. In this next video, shown on repeat in France, various couples are bumping the uglies, the 'AIDS 'asymptomatic carrier' then draws his pistol and shoots the '[newly infected](#)'. More Big Pharma lies about us all being deadly ticking timebombs.

The award for top 'over the top' AIDS terror advert surely goes to the Australian Grim Reaper. It's [laughably terrifying](#). Please watch if only to grasp the depths of fear the kings of the earth wished to cement into the mind of man over this new and terrifying fake threat to humanity. And again, just like c19, this AIDS campaign was a masterclass in synchronised terror orchestrated by the kings of the earth. And I'm loving how quickly this is going, btw! So much that no longer needs explaining!

Such adverts were appearing right across the first world and all at the same time. The new dissenter in you will now readily discern the evil Big Pharma rats and other vested interests scurrying around the set. And as we look at these adverts now and maybe even laugh at the naivety of the horror acting back then, dissenters would say those early AIDS adverts only mirror what the c19 'terror producers' are contriving for us today.

### **LATE NIGHT JIGSAW PUZZLES**

And so, with the UK AIDS task force now in place alongside almost all other first world countries, and with Fowler by now consistently using the terms 'deadly threat', 'invariably fatal' and of course 'no vaccine yet', and with the populace now sufficiently AIDS-brainwashed and alarmed, all we could do was sit in our D-Day AIDS bunkers, binoculars in hand listening to the crackling radio reports, and all of us steeling ourselves for the coming ~~SARS, Spanish flu, Zika, Ebola, Bird flu, swine flu, King Kong Korona~~ AIDS invasion.

And all that was going around in our heads was that we're promiscuous, we're to have ONE partner only, we could ALL be 'infected' and we must ALWAYS WEAR A CONDOM! These were the key statements being driven home in the Blanket AIDS Terror Campaign. This is how it was being sold to us. Sexual propriety was the order of the day. Never mind that Westminster was embroiled at the time in all manner of sex scandals. Leon Brittain had 'lost' the Westminster pedophile dossier of course but still the stories kept coming involving rent boys and stuffed brown envelopes to prostitutes. Tory bigwig Harvey Procter was fined and forced to resign that year over gross indecency

involving teenager 'spanking sessions'. The later allegations Procter had abused and even killed children at the notorious Dolphin Square 'meeting house' were thankfully all [written off as fake news](#).

And at the same time as those leaflets were dropping through 23 million letterboxes telling us how promiscuous we all are, married civil servant and soon-to-be Prime Minister John Major was completing late night jigsaw puzzles with back bencher Edwina Currie who later wrote in her memoirs how hurt she was she did not even feature in the index to his biography. John Major would later lead the car crash Tory 'Back to Basics' morality campaign which saw no let-up in Westminster sleaze as us lesser mortals were being told how to behave in the bedroom. Below, we see then Health Secretary Norman Fowler at another doom-laden AIDS press conference.

### **ACHESON, ROCK AND BOAT**

Ramping up the fear to warp factor 11, Fowler and Acheson played yet another AIDS asymptomatic card, Fowler telling us that once infected, ALWAYS infected, with Acheson stating, *'People infected are usually free of symptoms for many months or years, are unaware of their infections, but are nevertheless infectious. An exponential increase in the number of infected persons can be expected.'* We're infected with a killer virus but none of us know it. More asymptomatic fake AIDS announcements mirroring the fake asymptomatic AIDS TV adverts, yawn, yawn. And also said Acheson, because there was no cure or vaccine yet,

*'Plans should be based on the assumption that no means will be available to prevent the disease by immunisation in the next five years.'* [Source page 123](#)

WHAT!! NO VACCINE!! For the next FIVE YEARS? NOTHING AT ALL to protect us from this killer? More yawns from the 'infectious AIDS' dissenter. Asymptomatic AIDS and 'no medicines to save us' gives us a glimpse of the evil AIDS tennis the kings of the earth were now playing. Here were the same evil common denominators present in ALL Big Pharma/big gov plandemics. All it takes is for us to learn the algorithms. And I take it you recognise it now?

And just a minute on Chief Medical Officer and key AIDS influencer Donald Acheson. In his long career as a health professional, Acheson was President of the Association of Physicians of Great Britain and Ireland, President of the British Medical Association, a Fellow of the Royal College of Physicians, a fellow of the Royal College of Surgeons and a Fellow of the Royal College of Obstetricians and Gynaecologists. The words Acheson, rock and boat and AIDS were never going to appear in the same sentence.

Prior to his CMO post which he held for 8 years, Acheson was head of the Medical Research Council - the organisation which along with the hugely powerful pharmaceutical company Burroughs-Wellcome would be heavily involved in the early AIDS task force years. So that's comforting isn't it, seeing the Wellcome boys and painted lady MRC rolling around the AIDS boudoir just as they're rolling around together in the King Kong Korona boudoir. Another ugh! The crabs crawling around the place don't bear thinking about!

Having served his term as UK government CMO, Acheson moved on to the Rockefeller-funded London School of Hygiene and Tropical Medicine (where else?), and after that to 'revolving door' UCL - another teaching establishment owned lock, stock and barrel by the same crab-infested Wellcome. And so, dear readers, with Acheson at the helm at the height of the AIDS 'crisis', was there ever going to be any other outcome? Of course not! We were only ever going to be told we're all 'potentially infected'. Such lucrative forecasting for the kings is all part of the job description for the post of CMO, isn't it, Chris Whitty, and for

the post of Health Secretary, isn't it, fluent lair Matt Hancock! But you're gone now. For the time being, anyway.

By late 1986, health secretary Norman Fowler was already promoting Burroughs-Wellcome by actual name in the AIDS 'pandemic' discussions in the House. Said Fowler in one of these 'impartial' AIDS discussions, *'For example, Burroughs-Wellcome was responsible for developing the test for antibodies to the HIV infection which is now in use as the method for screening blood in this country. The same company, which has an excellent track record in vaccines and anti-viral drugs, has developed and produced AZT - currently the subject of clinical trials in this country.'* ([Word search Burroughs](#))

### **WE'RE SET FREE FROM THE 24/7 WICKED INDOCTRINATION**

And we're nearly at the wicked AZT but I really do think we're zipping along! Another MP lobbying hard in House for the 'AIDS fight' was MP for Canterbury David Crouch who was both a member of the MRC and a director of Wellcome Diagnostics! Well, knock me down with a feather! Said an impassioned Crouch in the House on 21<sup>st</sup> Nov 1986, *'We are at war with a new virus. We must get ourselves on to a war footing to tackle the great problem. We need to develop vaccines against the virus, and specific anti-viral therapies.'* In the same debate, Mr Robert Key MP for Salisbury noted the AIDS blood test produced by Burroughs-Wellcome is the best (word search [this Hansard document](#)).

Reading the above Hansard report as a dissenter, the ENTIRE document shows evil AIDS tennis being played at its evil best by evil, self-serving vested interests across the entire evil House. The Big Pharma vested interests and control exerted over parliament back then is no different today, and it would seem there's no escaping the Big Pharma gravy train, not this side of Paradise anyway. But, actually, understanding the sheer size and strength of this evil framework set hard in place above us is the first step to walking out from under tyranny of it all, and our God most definitely wants that for us!

And those have crossed the line in this regard, we're set free from the 24/7 wicked indoctrination and false teachings pouring out from these institutions.

We are not swayed one little bit by their lies, they're lying because their lips are moving. We see right through their 'breaking pandemic news bulletins', their 'exciting and outstanding science' and ESPECIALLY their shimmering 'good works worldwide'.

In fact, knowing the MRC and Burroughs-Wellcome were central to the AIDS government task force, do we really need to continue with the AIDS/HIV story any further to reveal its fakery? Yes we do. We must grasp the full horror of what these monsters achieved in the great AIDS tragedy, not only that we fully understand how they collaborated with one another to deliberately poison and kill thousands upon thousands of people, but also how they collaborated with naive and willing charities, naive and willing church universal and naive and willing us.

The true ugliness of the fake HIV hoax was camouflaged by the thousands of glowing, sincere and genuine, God-fearing, God-loving people working alongside the kings most of whom had not the slightest idea of the true luciferian population control agenda they were innocently helping to implement. Wake up church! Wake up people! Therefore, My people die through lack of knowledge, says our God.

## THE BEGINNING OF AIDS

### WHAT REALLY IS THIS DIS-EASE?

AIDS began with the pharmaceutical industry of course, as all supposed 'pandemics' do. But AIDS also began with the young and promiscuous, but NOT AT ALL in the way that we have all been taught to think about AIDS when we read 'young and promiscuous'. Whatever you think, think opposite.

In America in the late 1970s and early 80s, doctors in Los Angeles, San Francisco and New York began noticing emaciated young men AND WOMEN arriving at their surgeries. On questioning these patients, it soon became apparent the correlating factor was the east/west coast party scene. Excessive sexual lifestyles involving multiple partners and particularly the heavy use of cocaine and poppers plus lack of sleep featured across all of those early case histories.

This emaciation affected both the homo- AND the hetero-sexual communities but the hetero aspect to this 'disease' NEVER featured in the Madame Mainstream **GAY PLAGUE!** headlines which is how the homosexual AIDS stigma first took hold. Below, we see a typical headline at the time.

The truth is the 'men on men' bath house activities were no more licentious or prolific than the men on women and women on women sex parties at the time. Gary Null is a US alternative news radio show host who interviews dissenters from all walks of life. During the 1970s and early 1980s, Gary spent many hours interviewing literally hundreds of hetero- and homo-sexuals from the party scene. He witnessed first-hand the effects of their relentless lifestyle:

*'I went to the baths, to the night-clubs and I would hang out and interview people. I knew people who were partying 10 hours a night, 7 nights a week, for 2 or 3 years straight. There were two guys who lived nearby, and I spoke to them on a regular basis when I was out there. I watched them physically deteriorate. In less than six months, I saw them go from being really masculine and pumped-up bodybuilders, to just shells, emaciated... I found only 2 percent of people were doing it because they wanted to hurt themselves. Most of them just loved what they were doing. It was just like taking a kid and putting him in a candy shop. They wanted to eat everything in there, and the fact that they were going to get sick - well, you know '...the sickness will pass, let's keep gorging!'<sup>4</sup>*

Outright hedonism was the environmental factor which linked ALL of these early cases presenting at the various medical centres, and when those sick people did actually stop partying and gave themselves time off to recover, guess what, they recovered! But Big Pharma had other ideas.

As more and more cases began appearing, the US Centre for Disease Control whose primary role is to 'find' new diseases for their Big Pharma bosses leapt on this apparent 'new wasting disease' and decided it had to be a virus! A new disease plus a virus meant more drug sales! All that was needed was for the virus for this disease to be 'isolated'.

## **ANOTHER BIG PHARMA PERFECT COMMERCIAL CIRCLE**

At the same time, acclaimed virus hunter Robert Gallo, (later dubbed the pope of AIDS and occupying a 'pandemic figurehead' role similar to c19 Anthony Fauci) was on the hunt for the virus he believed caused leukaemia. Gallo leapt on this new 'homosexual thinning disease' and soon after, claimed to have identified the virus causing AIDS - Human Immuno-deficiency Virus aka HIV. Well I never! A virus hunter discovers that a virus is the cause of AIDS!

Gallo's HIV of course was never independently verified, and it hasn't been to this day! Here are the latest images for HIV featuring the same glowing golf balls with the same little pylons [sticking out](#). It's laughable, isn't it. But independent verification wasn't required back in the AIDS heyday. None of those sensibilities mattered, they never do. Big Pharma never needs to bother with any proof for any virus, so programmed are the masses into believing virus theory, with the

---

<sup>4</sup> Null, Gary, Zenger Magazine, 1997

result that on 24<sup>th</sup> April 1984, US health secretary Margaret Heckler announced the [PROBABLE cause of AIDS](#) had been found. Never-proven Human Immuno-deficiency Virus was born.

At the same time as 'discovering' HIV, Gallo also 'invented' a blood test which he said could detect his fake virus! Genius! Approximately one year after 'discovering' the virus, on 29<sup>th</sup> May 1985, the patent for Gallo's infamous ELISA HIV blood test was granted. It was this blood test said Gallo which 'proved' the existence of HIV - the exact same test that today is 'proving' the existence of c19. You're infected with a deadly virus! My test can detect the antibodies to that virus! Take the test! I told you so!

The endless AIDS loop is also the endless King Kong c19 loop, just like the endless Ebola, SARS, Zika, bird flu, swine flu loop, another Big Pharma perfect commercial circle. But for the science purists, prior to the fake Gallo HIV antibody test, the presence of antibodies in the blood had NEVER been used as an indicator of ANY illness. But since Gallo's HIV hypothesis was popularised, antibody testing as an indicator of alleged 'infection' or disease has become *de rigeur* across many branches of profiteering, poisonous 'medicine'. Once again, heightened cell activity in the bloodstream is merely an indication of a normal and healthy immune system response. But how we love to get tested!

Yet if we bothered to ask questions of those tests and resisted the invitations to whatever testing station when they drop through our door, how much healthier might so many of us be today and still living! And this is supported by an increasing number of doctors protesting at too much medicine. Says this page on the BMJ site: *'The BMJ's Too Much Medicine initiative aims to highlight the threat to human health posed by over-diagnosis and the waste of resources on unnecessary care. We are part of a movement of doctors, researchers, patients, and policymakers who want to describe, raise awareness of, and find solutions to the problem of [too much medicine](#).'*<sup>5</sup>

---

<sup>5</sup> The BMJ report continues: *'Causes of too much medicine include expanded disease definitions, uncritical adoption of population screening, disease mongering and medicalisation, commercial vested interest, strongly held clinical beliefs, increased patient expectations, litigation, and fear of uncertainty and new technology. Winding back the harms of too much medicine invites clinicians to focus on those who are sick, and only intervene with those who are well when there is a strong case to do so.'*

## THE NATURE OF AIDS DRUGS

At the same time as fraudulent AIDS was being hurriedly and most deceptively fashioned into something resembling real science, Burroughs-Wellcome was sitting on a mountain of the drug Azidothymidine or AZT which had been developed in the early 1960s as a cancer drug but was shelved after trials found it caused too much damage and death and was also totally ineffective in 'curing' cancer. AZT was soon however to play a huge role in 'the battle' against AIDS.

So, what exactly is AZT? Here's a brief summary. AZT [destroys bone marrow](#), causes cancers, causes severe birth defects and induces abortions. Here is a standard [AZT medicine bottle label](#) and here is the AZT warning advice label which is to be [displayed](#) on ALL laboratory walls where AZT is manufactured and or stored or administered. The original AZT package insert lists some of the side-effects: **WHOLE BODY:** abdominal pain, back pain, body odour, chest pain, chills, edema of the lip, fever, flu symptoms, hyperalgesia. **CARDIOVASCULAR:** syncope, vasodilation. **GASTROINTESTINAL:** bleeding gums, constipation, diarrhoea, dysphagia, edema of the tongue, eructation, flatulence, mouth ulcer, rectal haemorrhage. **HAEMIC AND LYMPHATIC:** lymphadenopathy. **MUSCULOSKELETAL:** arthralgia, muscle spasm, tremor, twitch. **NERVOUS:** anxiety, confusion, depression, dizziness, emotional lability, loss of mental acuity, nervousness, paresthesia, somnolence, vertigo. **RESPIRATORY:** cough, dyspnea, epistaxis, hoarseness, pharyngitis, rhinitis, sinusitis. **SKIN:** rash, sweat, urticaria. **SPECIAL SENSES:** amblyopia, hearing loss, photophobia, taste perversion. **UROGENITAL:** dysuria, polyuria, urine frequency, urine hesitancy.

### AVALANCHE IS NO HYPERBOLE

This is exactly why AZT was shelved in the 1960s. But what to do now with this poisonous mountain? Burroughs-Wellcome needed rid of it and seeing a potential business opportunity in 'fighting' AIDS, dark angel Borroughs-Wellcome sent a sample of AZT to the US Food and Drug Administration where FDA experts immediately claimed 'remarkable results in mice! After all the usual Big Pharma paperwork, legal wranglings and a human trial lasting just 4 months, in March 1987 AZT was approved for use as an AIDS medicine. In the worldwide 'battle' against Acquired Immune Deficiency Syndrome, there was now a glimmer of hope. Not for the recipients of course, this AZT was to become the death of them. It was only good news for Borroughs-Wellcome, she could get rid of her mountain of AZT! And so the AIDS downward slope continues.

The short duration of the AZT trial was a genius move. Burroughs-Wellcome cut it short claiming the trial was so successful, it would be immoral not to bring the

drug to market immediately! People were dying of the vicious virus, AZT was showing clear signs of success, why wait any longer? Forward to 2020, and the same Wellcome has been going to the same lengths to tell the world the c19 vaccine was desperately needed out there but rest assured, the vaccine must be tested thoroughly before being [delivered to the populations](#). And so knowing what you know now, do YOU trust Wellcome? Already, thousands have died as a result of the vaccine. Him with an ear, let him hear.

Back to AZT and Burroughs-Wellcome ignored the fact that Richard Beltz, the creator of AZT had called for the abandonment of this drug a) because its extreme toxicity made it unsuitable for any chemotherapy - even short term, and b) the drug was carcinogenic (cancer causing) at any dose.<sup>6</sup> Beltz would also later say to South African lawyer Anthony Brink who was demanding AZT be withdrawn, *'You are justified in sounding a warning against the long-term therapeutic use of AZT, or its use in pregnant women, because of its demonstrated toxicity and side effects. Unfortunately, the devastating effects of AZT emerged only after the final level of experiments was well underway. Your effort is a worthy one. I hope you succeed in convincing your government [not to make AZT available](#).'*

Effortlessly smoothing over the yawning cracks in miracle drug AZT, fully paid up pole dancer to the kings Time Magazine said later of the AZT trial, *'Scientists quickly injected AZT into patients. The first goal was to see whether it was safe, and although it did cause side effects (including severe intestinal problems, damage to the immune system, nausea, vomiting and headaches) it was deemed [relatively safe](#).'*

Relatively safe? In the same way that drinking battery acid is relatively safe? AZT was now approved for use on humans again, and not just emergency use only but FULLY APPROVED. Burroughs-Wellcome could make some shelf space and also a shed load of money! What's not to like if you're a luciferian king of the earth not caring a damn your poisons would be killing people! It was a perfect outcome for the kings, but many sound-thinking doctors were horrified.

---

<sup>6</sup> Cohen, S S New England Journal of Medicine, 317 (1987): 629

A Dr Harvey Bialy, molecular biologist and science editor of *Bio/Technology*, stated: *'I'm stunned by the low quality of science surrounding AIDS research. I'm horrified by the widespread use of AZT. Not just because it is toxic, but because the claims of efficacy are false. I can't see how this drug can be doing anything other than making people extremely sick.'*<sup>7</sup> Below, we see a poor soul whose antibodies had triggered a false positive on the HIV test and was now dying of AZT poisoning while the world looked on and blamed the skeletal thinning and organ failure and hair loss on fake HIV.

And again, just like the planned King Kong Corona 'epidemic', king of the earth Burroughs-Wellcome knew an AIDS pandemic was coming. And we know this because in 1985 Burroughs Wellcome filed a patent on useless, poisonous AZT - two years prior to the worldwide AIDS pandemonium. Why would Burroughs-Wellcome want to file a patent on a dormant and defunct and poisonous drug unless she knew she was shortly set to make a fortune on it? Again, the c19 parallels are all too obvious.

---

<sup>7</sup> Project AIDS International, Public Information Dossier, *ibid*.

And so, with AZT once again approved for human use, and approved in record time, and DESPITE its known terrible side-effects, doctors began prescribing AZT to their emaciated patients who needed only to be told to stop with their reckless behaviour, stop taking the poppers and cocaine and

other party drugs, get some proper sleep, start eating and hydrating sensibly and your body will begin to recover. Instead, they were given poisonous AZT plus continuing on with their reckless life-styles, and the unsurprising avalanche of deaths soon followed. And I don't use the term avalanche as hyperbole. And church universal had a lot of ideas on why AIDS was running rampant. Below left, and ignoring the murderous vicar nonsense, we see a headline which fairly summarised the sentiments of church universal at the time. AIDS was God's wrath being poured out on all homosexuals.

What the world believed was a deadly virus in those first early days of AIDS was simply a combination of an immune-threatening lifestyle compounded by devastatingly toxic AZT. As Antoine Bechamp would say, an already stinking goldfish bowl had now attached itself to the main sewer. Once more, the TRUE cause of supposed viral AIDS was WHOLLY ENVIRONMENTAL and with NONE of these illnesses and deaths needing ANY fake AIDS virus to explain any of them. But worse was to follow. Much worse.

Madame Mainstream in conjunction with the 'AIDS experts' were now telling us ANYBODY could 'catch this deadly virus'! It was clinging to everything! Door knobs, tea cups, lift buttons, dentists, tattooists - everywhere was alive with HIV! Hello, King Kong! Fancy meeting you here again, you stinking witch! The coincidences are extraordinary, until you understand the evil algorithm. Millions upon millions could already be infected, said the kings of the earth. But thank God miracle AZT and now the Korona vaccine were available! Burroughs-Wellcome was now charging 'first world' patients £10,000 for a one year supply of AZT. Her mountain of pure poison was disappearing fast.

At the same time, fully paid up Big Pharma agitator groups like Act Up (led by 'good friend' of Anthony Fauci, [Larry Kramer](#)) were on the streets demanding Big Pharma bring her prices down to make AZT available to all. These widely-televised street protests demanding AZT and health equity for all was simply another play on evil tennis. Once again, Big pharma was engineering our breakfast conversations, this time on how terrible it is these life-saving AIDS drugs are so darned expensive. The governments should step in and make this AZT stuff available to everybody, we all said. It's the only moral thing to do! Pass the marmalade, dear.

And isn't it great I can summarise these deceitful Big Pharma practices and us so speedily now and it's not a struggle to believe such evil and naivety could exist. But for anybody who is struggling with this contrary AIDS story, there's

a mountain of excellent information online. As I say, AIDS is considered 'old hat' now which is why gootube hasn't bothered to remove sites [such as this](#).

And so, as the world watched superstars wither down to skeletons - Freddie Mercury, Arthur Ashe, John Curry, Oscar Moore, Denholm Elliott, Kimberley Bergalis, Ryan White, Kenny Everett, and Derek Jarman plus [countless](#) others - we all gasped at the cruelty of killer HIV, yet ALL of them were diagnosed using Gallo's fake HIV test and ALL were treated with poisonous AZT. Skeltal AIDS was nothing more than [AIDS by prescription](#). Said AIDS dissenter Robert Young, *'In typical fashion, the news media focused upon, and widely broadcast, the details of their gradual degeneration and painful deaths, which exhibited all the classic symptoms of AZT poisoning. 'AIDS' death and AZT death are outwardly indistinguishable. Here is a perfect combination: an illness incorrectly billed as universally fatal, treated by a useless, [frequently fatal drug](#).'*

Yet to millions and millions of us now, as we watched these superstars fade away on every front page, fake, unproven, luciferian Human Immuno-deficiency Virus was really, REALLY REAL! I mean, just look at how gaunt our Freddie looks now. You can't argue the virus!

And just as so few are listening to the King Kong Korona watchmen, a fake Big Pharma fantasy 'sex virus' was ripping across the world and everybody believed it. Right, we see another poor soul dying of AZT and lack of knowledge. My people die through lack of knowledge, says our God.

## FASHIONABLE AIDS

Onwards to the early 90s and with the horror of an AIDS virus now fully cemented in the public psyche, a red AIDS ribbon appeared out of nowhere which we could all wear as a sign of our support for all the heroic AIDS agencies 'battling on our behalf', and in memory of the superstars and everybody else who had succumbed to the fake HIV.

### **LOWER THAN SHARK \*\*\*\* ON A DEEP SEA DIVER'S BOOT**

Yet again, Madame Mainstream had expertly concocted an aura of worldwide death and AIDS mayhem, and at the same time was able to convince us we all had our part to play, and wearing the red ribbon was proof positive you cared. And we were given a World AIDS Day too December 1st, and woe betide anybody who actively spoke out against the red ribbon and that hallowed day. Similar to those who criticised the NHS c19 Thursday clap (which most staff hated anyway), those who questioned the red ribbon campaign were the vilest of the vile, lower than shark \*\*\*\* on a deep sea diver's boot, mentally retarded and fit only to be euthanized. Have you AIDS denialists not been watching TV?

Yes, we were, hours of it. Hours and hours of ingratiating 'first world virtue signalling' from Elton John and Princess Di and Brian May and Dermott O'Leary and roving AIDS reporter Lenny Henry reporting live from various African/Asians villages showing how our donations were helping to set up another rural HIV testing station or 'AIDS medicine clinic' but with viewers having no idea our money was helping to deliver only more illness and death across whatever continent in the form of AZT.

For me, this reddit post sums up the emotional manipulation of the Thursday NHS Corona clap and by default the AIDS red ribbon: *'It's insincere, gives participants a false sense of contribution, and does nothing meaningful or helpful, yet has already become quite ingrained as a semi-mandatory expression of British pride.'* And another, *'Totally agree. It's tokenism that reminds me of the hysterical thing with poppies that happens in November. It's the kind of thing that ignores the character of people and any nuances in feelings and it reduces us to clap for NHS = good. Don't clap = you are a bad person. It's the kind of action that is a replacement for actual change in society and means we can ignore the bigger issues and debates around [the issues](#).'*

Too right, the bigger issues aren't being debated. And 'national treasure' Elton John is in the thick of the fakery again with his latest live-streaming [Korona koncert](#). More fakery from celebrities making us feel like we're part of one giant, happy King Kong conquering family - cynically-motivated celebrities who ABSOLUTELY know the real score with fake c19, and who have seen to it via their press agents and instagram they're fully protected against the fake monster Kong virus with their own version of the Anthony Hopkins Car Park vaccine. In case you missed it, the AHCP vaccine is well worth the [watch](#). I'd love it if a nurse could pretend to vaccinate me and then squirt the contents into the air.

### **PLUS ACCOMPANYING UPBEAT ADVERTISING**

And so, with World AIDS Day now an international institution (conceived by James Bunn and Thomas Netter from the World Health Organisation would you believe, smh), the crazed red ribbon mist descended, and in their lust for money at the expense of human life, other Big Pharma kings were keen to get on the AIDS gravy train and had been developing their own equally devastating 'AIDS medicines' plus accompanying upbeat advertising. **Celebration of Life! Investing in Your Future!** Pharmacia & Upjohn. **The Tide is Turning in HIV Therapy!** Boehringer Ingelheim. **We're Working on It!** Merck, Sharp & Dohme.

Competitors couldn't make an AZT equivalent of course, AZT had already been patented, and so the new 90s AIDS drugs were re-branded as 'protease inhibitors' and 'cocktail combos' which did not carry the same industry stigma as AZT but were still just as poisonous.

Drug company Merck muscled to the front with Crixivan which was granted approval in just 42 days. Said early AIDS dissenter Christine Maggiore: '*Crixivan's FDA approval broke a 72-day record for the fastest approval in FDA history, previously set by the protease inhibitor Ritonavir. Newsday articles noting the toxic effects of these drugs - diarrhea, nausea, fungal infections, bloody urine, kidney stones, weakness, headaches and liver inflammation requiring doctor visits and additional medicines - were ignored by AIDS organizations, who pressured the FDA for fast track approval.*'<sup>8</sup> Recently reported side-effects include *CMV retinitis, diabetes, liver failure, 'buffalo humps' (large fat deposits at the base of the neck), acute kidney failure, acute pancreatitis, grade four diarrhea and sudden death.*'<sup>9</sup>

And so, with all of the kings now baying for AIDS profits and knowing full well the non-specific nature of Robert Gallo's fraudulent HIV test, and knowing full well the toxicity of their 'sudden death medicines', the kings of the earth were now giving instruction to Madame Mainstream to push for EVERYBODY to be tested, and especially expectant mothers.

On 24<sup>th</sup> November 1999, the London Evening Standard ran the following headline: **CALL TO TEST ALL MOTHERS AS LONDON HEADS HIV BABY LEAGUE - All pregnant women should be tested for HIV, particularly in London where more babies are born with the virus than the rest of Britain, experts have warned. Dr Walters, a senior lecturer in paediatrics and infectious diseases at St Mary's Hospital Paddington, said, 'One of the advantages of testing pregnant women is that we are able to offer them healthcare before they become very ill.'**

Now, there's a surprise - not. Mandatory HIV testing. And especially not a surprise when we understand the kings' fixation on destroying the baby in the womb. Is the full horror of what is unfolding here beginning to register, my friend? AIDS 'medicine' is satanic medicine at its most grotesque. These mums to be were advised (all very nicely of course) to take the Gallo test. '*I think it's best Sophie we test you and baby for HIV given the current climate. Don't worry though, it's just a tiny prick to the finger.*' What responsible mum to be would refuse such a disarming request? If Dr Walter advises getting tested and he calls it healthcare, then who am I to argue?

### **MARKED DOWN AS THE IRRESPONSIBLE, NON-COMPLIANT ONES**

And so, the young expectant mum with heightened blood stream activity ([because that's what pregnancy does](#)) submits to the fake Gallo blood test

---

<sup>8</sup> Newsday Magazine, 30<sup>th</sup> January 1996

<sup>9</sup> Lancet, 1<sup>st</sup> June 1997. Vol.349, p.1745; Philadelphia Inquirer, Associated Press Report, 13<sup>th</sup> June 1997; Rolling Stone Magazine, 'Special Report: Dr David Ho and the Lazarus Equation', 6<sup>th</sup> March 1997; The Valley Advocate, 'The Big Tease', 20<sup>th</sup> February 1997

(which responds false positive to some 70 different conditions INCLUDING [PREGNANCY](#) ) and the clinician delivers the shocking news. 'Don't worry, dear', young mum is told, 'there have been considerable advances in HIV medicine recently, and we're blessed now to have targeted treatments! Between us, let's tailor a program specific to you!' And the effects of these targeted treatments on mother and baby? Christine Maggiore again:

*'The effects of the drugs on the mother include muscle deterioration, severe anaemia, nerve damage, liver and kidney damage, diarrhoea, dementia and seizures. The effects of these drugs on the developing foetus include deformities, and other birth defects, spontaneous abortions and the need for therapeutic abortions of severely damaged foetuses.*

*In many states today, children who test HIV positive risk being removed from their homes by the welfare agencies or public health services if the parents do not agree to give them treatment with AZT or other pharmaceuticals.”<sup>10</sup> Above, we see a new born baby being 'administered' the AIDS drug nevirapine and all because Mum tested HIV positive on the fake HIV test.*

As a result of all of this horror, I became involved with organisations in helping to bring this contrary information to people's attention and particularly to expectant mothers, so many of whom had NO IDEA of the fraudulent nature of the HIV test or of the devastating effects of the drug regime that followed. There were however a few dissenter expectant mums who knew only too well they could test false HIV positive and be forced to 'take the medicines', and they knew what would happen to them if they refused. These mums would be marked down as the irresponsible, non-compliant ones. Officialdom would stand over them at the birth and would straight away take baby away to be tested, and if baby tested positive, both mother and baby would forcibly be given the Burroughs-Wellcome 'treatment'. And we all thought we'd moved on from JD Rockefeller's original 'coal tar cure'. Lord, forgive us our AIDS trespasses!

## **THOUSANDS UPON THOUSANDS OF FALSE POSITIVE DIAGNOSES**

And so, knowing the dangers they faced, these dissenter mums were left with no option but to disappear with their precious child/children. They literally became mums on the run. And so this is another place our God takes His dissenters to, my friend, so we might help by whatever means to rescue His

---

<sup>10</sup> Maggiore, Christine, *ibid.* p.14

children from this evil state tyranny. And this medical tyranny will be coming again my friend if BMGF and WHO get their way to mandate the fake c19 ELISA Lateral Flow Test and poisonous c19 vaccine. And it won't just be mothers and babies on the run either.

To summarise the state of AIDS play so far, the wholly inaccurate and unscientific HIV test was *de rigueur* across conventional medical practice and was now triggering thousands upon thousands of false positive HIV diagnose, in turn leading to AZT and its derivatives being prescribed and causing much illness and death, in turn deceiving the whole earth into believing that HIV was dangerous and real, and all the while, these horrific drugs were making million\$ upon million\$ for their luciferian manufacturers. And on top of all of this medical deceit and mayhem, Madame Mainstream was hyping 'infectious AIDS' 24/7 and demonising the homosexual community for the 'spread of HIV' when promiscuous heterosexual activity was and still is just as prevalent.

And so, with ALL of these evil factors now in play, WHO, the United Nations and the Bill and Melinda Gates Foundation and associated UN agencies were now setting their sights on 'third world' Africa and Asia. After all, that's where this AIDS virus originated according to conventional 1980s wisdom. And so it was the turn of far away continents now to suffer exactly the same poisoning as the 'first world' but in far greater number - countries whose hungry and immune-suppressed populations needed only mosquito nets, clean water, simple sensible nutrition and autonomy. And they wouldn't be missed when they were gone, either, not by the 'first world' anyway. And are you sick of the term first world yet? Is it starting to make you heave? I'll not be stopping using it just yet.

## WHY WE THINK THE WAY WE THINK ABOUT AFRICA

Whipping up public support for some kind of AIDS initiative to begin as soon as possible over in Africa, deceitful TV crews and reports captured all manner of fake African AIDS landscapes. Similar to Penny Marshall & Sons, we were being given emotive reports of coffin makers working through the night, coffins lined end to end in the streets and coffin makers even running out of wood! After one particular Daily Telegraph story telling us about coffin makers [running out of wood](#), I tracked down the coffin makers and unsurprisingly, the Daily Terrorgraph was lying again. There was no wood shortage, no end-to-end coffin bottle-neck and no end-to-end bodies.

These are the telephone calls you make when you wear pink, and if more people made them, would we even have the fake Korona pantomime we have with us right now? But nobody was bothering to check out these African AIDS stories for themselves, I mean, this is mud hut, emaciated, fly-ridden Africa we're talking about! The story must have a ring of truth to it, the third world is riddled with disease! Lord forgive us our supremacist tendencies.

**PRESSTITUTE ROGER HIGHFIELD** In another Terrorgraph article dated 20<sup>th</sup> September, 2000, Terrorgraph science editor Roger Highfield brought us the usual bullshit infectious African AIDS terror content and provided 'a photograph' of the supposed virus, the caption reading **Culprit: the AIDS virus** The off-symmetrical black and white golf ball was credited to the London Science Photo Library, making the image easy to track down. Calling LSPL to enquire about the image, picture editor Justin Hobson was refreshingly forthright: *'Oh yes, that was one of a number of computer-generated artists' impressions of what the AIDS virus might look like. In Highfield's article you are not seeing the real thing, it's only an impression. In fact we had another call from a scientist who was also concerned that the image was quite misleading. We supplied Highfield with a number of images, but he specified he wanted a computer graphic.'*

Presstitute Roger Highfield wanted something glowing and virusy-looking. His article plus cgi fake virus (right) is utter horse manure. Actually, strike that, horse manure is useful.

And so who is the real culprit in Roger Highfield's 'culprit' story? It's not the golf ball, is it! It's Roger Highfield and all the other Madame Mainstream liars promoting the fake plague. The ENTIRE Terrorgraph science team as well the home affairs and foreign correspondent desk were sent ALL of the necessary contrary information on AIDS/HIV plus contact details, as were all the UK broadsheets, and NOT A SINGLE ONE OF THEM followed up any of the info.

You make these calls to these departments when you're a dissenter. You chase the evidence down, you do what you can so that when you bring your evidence before your fellow man, you can stand before God and man and with hand on heart, you can look everybody in the eye and tell them you've walked the walk. And after you've chased down whatever evil in your new pink attire, you can ask your fellow man, have YOU walked the walk? Because 99 times out of 100, they won't have done. They'll be classic armchair critics. Chasing down the evidence will be your job now, my friend, sporting your pink!

### **IT WAS ONE GUY SCREWING A MONKEY IF I RECALL CORRECTLY**

Our nightly news bulletins from the AIDS 'frontline' brought us all the usual images of desperately thin and HUNGRY Africans along with patronising and overtly racist reports of African promiscuity, writhing black lust-filled half-human creatures in the townships, nobody using condoms, horny truck drivers 'catching the virus' from prostitutes at various truck stops, children catching 'HIV' from playing with dead monkeys found on the jungle floor, Africans injecting themselves with 'infected' monkey blood and even having sex with monkeys, YES THIS WAS OUR NEWS!

Rosalind Harrison-Chirimuuta wrote *AIDS, Africa and Racism*. In it, she discusses the building of the 'infectious AIDS' myth. *'Discussion quickly moved on to the question of how the virus crossed the species barrier, and two AIDS 'experts' from St Mary's Hospital London offered this explanation: 'Monkeys are often hunted for food in Africa. It may be that a hunting accident of some sort, or an accident in preparation for cooking, brought people in contact with infected blood. Once caught, monkeys are often kept in huts for some time before they are eaten.'*

*Dead monkeys are sometimes used as toys by African children.<sup>11</sup> Are we seriously to believe African parents are so desperate for toys for their children that they give them putrefying [carcasses of dead animals](#)?<sup>12</sup>*

The sickening barrage of African AIDS lies such as 'dead toy monkeys' and end-to-end coffins and rampant African promiscuity served only to further pollute the first world AIDS hive mind. Here's Tennessee State Senator Stacy Campfield reinforcing the racist narrative, '*Most people realize that AIDS came from the homosexual community - it was one guy screwing a monkey, if I recall correctly, and then having sex with men. It was an airline pilot, [if I recall](#).*'

And here's just one of literally hundreds of first world reports which discuss the link between third world AIDS and third world promiscuity. Entitled Promiscuity Personified - On The Road In Africa, this paragraph says it all. '*Truckers are what's called a disease vector - an entry point into the general population - because they not only frequent sex workers routinely, they also have wives or long-term partners at home, to whom they regularly return, and who often [pass the virus to their children at birth](#).*'

Churning out similar lies, the UK Guardian has a [Global Development](#) site which is funded by the Bill and Melinda Gates Foundation. Joint editor at Guardian Newspapers Anushka Asthana wrote regularly for Global Development. Here, she tells us how [Africa's Fatal Sex Culture Spreads AIDS](#). But as she spouts this garbage, doesn't it ever occur to any of these writers to do a piece one day on the promiscuity in our own back yard? As Anushka surveys the city from her BMGF-funded swivel chair, I wonder if she ever wonders why the same sexually-spread HIV isn't 'tearing through' or 'decimating' Canary Wharf or Camden or Westminster with all its restaurants, supermarkets, clean water and accomodation? And especially since the UK comes top of World Population Review [promiscuity list](#).

But with all of these African AIDS reports now, here was something we could seriously tut tut about at the breakfast table. Similar to our King Kong asymptomatic carrier chat or herd immunity and self-isolation chat, with AIDS, we had 'African truck driver meets prostitute' chat, 'humping black frenzy' chat and of course 'gay plague' chat. There was a veritable feast of licentious school gate 'AIDS chat' we could unpick between us, and ALL OF IT given to us by the kings of the earth. They're good at giving us our first world conversations, aren't they, these kings!

## AND WITH IT CAME THE SLANDERING OF AFRICA

But third world Africa has always had an unfair press. Pliny the Elder didn't help. He was one of the first 'historians' to describe Africa and its inhabitants. His 1<sup>st</sup> Century *Summary of the Antiquities and Wonders of the World* brought some extraordinary ideas back to the first world: *'Of the Ethiopians there are some that have neither nose nor nostrils, but the face all full. There are some called the Syrbote that are eight foot high and live with the chase of elephants. In a part of Affrike be people called Ptoemphane, for their king they have a dog, at whose fancy they are governed. Towards the west, the Arimaspi, a people that hath one eye in their foreheads. The Cinamolgie, their heads are like the heads of dogs. Grammantes make no marriage, but all their women are common. Gamphasantes go all naked. Blemmy is a people who have no head at all. And others that walk more by training of their hands than with their feet.'*<sup>13</sup>

Pliny's fanciful imaginings served only to confirm he had ventured no further than Germany in his life but in his limited travels, he had still managed to amass 20,000 facts, allegedly, [hahaha!](#) More accurate historical documents describe Africa as a culturally sophisticated and thriving continent, the birthplace of modern mathematics, a successful trading empire and a continent rich in mineral deposits and other natural precious commodities.<sup>14</sup> Between 1509 and 1513, Leo Africanus kept an account of his journeys in Africa. Here he describes one of the regions widely believed to be populated by Pliny's fictional monsters.

*'I myself saw fifteen kingdoms of the Negroes. In Tombuto (Timbuktu) there are many shops and merchants and especially of such as weave linen and cotton cloth. And hither do the Barbarie (Barbary) merchants bring cloth of Europe. Corn, cattle, milk and butter this region yieldeth in great abundance. Here are great store of doctors, judges, priests and other learned men that are bountifully maintained at the King's court and charges.'*<sup>15</sup>

Interspersed with warring of course, sophisticated Africa enjoyed many centuries of successful trading with other continents. But then, disaster! Africa was 'discovered' by base and savage first world white man. And with it came the slandering of Africa and UK/US-led slave trade. In 1748, British philosopher David Hume, a leading figure and influential shaper of first world public attitude wrote: *'I am apt to suspect the negroes, and in general all the other species of men (for there are four or five different kinds) to be naturally inferior to the whites. There never was a civilised nation of any other complexion than white.*

---

<sup>13</sup> **Reader, John** Africa - A Biography of a Continent, Hamish Hamilton, 1997

<sup>14</sup> **Brown, Michael** Africa's Choices, Penguin, 1995. Brown notes that Francis Bacon, the founder of modern European science, went to Morocco to learn his mathematics.

<sup>15</sup> **Africanus, Leo** A Geographical Historie of Africa, 1600

*No ingenious manufacture amongst them, no arts, no sciences. Such a uniform and constant difference could not happen, in so many countries and ages, if nature had not made an original distinction betwixt these breeds of men.'*<sup>16</sup>

Thomas Atwood, chief British judge of Dominica and later of the Bahamas, stated: *'Negroes are in general much addicted to drunkenness, thievery, promiscuity, and idleness. Idleness is so very predominant in Negroes, and their dislike of labour is so great, that it is very difficult to make them work. Sometimes it is necessary to have recourse to measures that appear cruel, in order to oblige them to labour.'*<sup>17</sup>

With the Victorian era came the shameful rise of the 'Glorious British Empire' - an era which saw much cruelty as first world 'Grate Britain' exerted its dominance over third world African soil. In his book, the self-explanatory *Marching over Africa*, Frank Emery collated numerous letters written by British servicemen serving in Africa between 1868 and 1898. Included is the following: *'My darling Mother, we had a great fight yesterday, and you will be glad to know I am all right. The Egyptian dead and wounded looked ghastly as we passed them in our advance, their dusky faces upturned in the blazing sun. One fellow ran right along in front of the whole line. I should think he ran 600 yards, and it certainly took 30 or 40 shots before he was hit. I felt quite sorry for the poor beggar. It was really quite like rabbit shooting. I think the big fight to take Tel-el-Kebir will be the day after tomorrow. Goodbye now, dearest Mumseh. With best love to all at home and the Park, Marling.'*<sup>18</sup>

## **THEY HOWLED AND LEAPT AND SPUN**

Equatorial explorer Joseph Conrad spent many years working and travelling throughout inner Africa. His 1901 novel *Heart of Darkness* tells of a steamer voyage into the unexplored heart of the Congo and follows able seaman Charles Marlow on his quest to track down a Mr Kurtz, an ivory dealer, living somewhere in the jungle and reported to be dangerously insane. *Heart of Darkness* was widely read and served as an early 'Africa tourist guide' for the first world and

---

<sup>16</sup> Fryer P *Staying Power: The History of Black People in Britain*, Pluto Press, London and Sydney: 1987

<sup>17</sup> Fryer P, *ibid.*

<sup>18</sup> Emery, Frank *Marching over Africa*, Hodder and Stoughton, 1986

became the chief inspiration for Francis Ford Coppola's *Apocalypse Now*. And thanks to similar inspiration, *Smoke and Mirrors* takes us on a similar journey into our own city, our dark interior, the heart of darkness.

Here, Conrad brings us bulletin from the wild frontier. *'We penetrated deeper and deeper into the heart of darkness. We were wanderers on prehistoric earth, on an earth that wore the aspect of an unknown planet. Suddenly, as we struggled round a bend, there would be a glimpse of rush walls, of peaked grass-roofs, a burst of yells, a whirl of black limbs, a mass of hands clapping, of feet stamping, of bodies swaying, of eyes rolling, under the droop of heavy and motionless foliage. The steamer toiled along slowly on the edge of a black and incomprehensible frenzy. The prehistoric man was cursing us, praying to us, welcoming us - who could tell? We were cut off from the comprehension of our surroundings; we glided past as phantoms, wondering and secretly appalled, as sane men would be before an enthusiastic outbreak in a madhouse. No, they were not inhuman. Well, you know, that was the worst of it - this suspicion of their not being inhuman. It would come slowly to one. They howled and leaped, and spun, and made horrid faces; but what thrilled you was just the thought of their wild humanity - like yours - the thought of your remote kinship with this wild and passionate uproar.'*<sup>19</sup>

With reports such as these being brought back to first world shores, one can confidently predict a 'sophisticated Africa' did not spring to mind in the spellbound reader. And like some sort of intangible heirloom, a wild and threatening Africa has been passed down through the generations and remains today.<sup>20</sup> And to varying degree, when asked to imagine the average circumstances of the average African, the average first worlder still imagines an unclean, woolly-headed, promiscuous hut dweller. It's in our DNA, smh.

### **THIS FALSE IDEOLOGY REIGNS SUPREME TODAY**

Back to the book *AIDS, Africa and Racism*, and Rosalind's summary of the inherent racism in the HIV debacle is sobering. Says Rosalind, *'Within the scientific literature about AIDS and Africa, all the racist themes can be found underpinning arguments for which scientific evidence is contradictory or absent:*

- *Africans are primitive peoples living in isolated tribes cut off from civilization, so they could have harboured diseases for centuries before they spread to the rest of the world.*

---

<sup>19</sup> Conrad, Joseph *Heart of Darkness*, Penguin, 1994

<sup>20</sup> See also Said, Edward, *Orientalism. A historical Perspective of Cultural Imperialism in the West*, Vintage Books, 1979

- *They are evolutionarily closer to monkeys, thus could more readily acquire monkey diseases, perhaps by having sexual relations with monkeys or at least involving them in their sexual practices.*
- *They are sexuality unrestrained, and a sexually transmitted disease would therefore spread more rapidly amongst them than any other people.*
- *Their intelligence is limited and they cannot understand the complexity of a disease such as AIDS, and their objections to being attributed with its source are harmful to themselves and do not need to be taken seriously.*

And on the structure of the entire HIV business model, Rosalind notes far more politely than I ever could, *'Scientists working in the field are unlikely to challenge the existing paradigm, in part because of training and discipline, which can constitute a form of internal censorship, and in part from external peer pressure. The latter can be of a very practical nature, as scientific careers can only progress if funds can be obtained for research projects and the results of research are published in learned journals. Leading scientists in the field normally have influence over both the allocation of funds within their field of research, and, by the process of peer review and editorial control, publication in scientific journals.'*

## **WIDE-EYED UNSUSPECTING RABBITS**

A complete account of Rosalind's excellent work [can be found here](#). Once again, our luciferian first world angels have stoked our own vainglorious 'promiscuous Africa' imaginings and this false ideology reigns supreme today. Anybody who argues this isn't the predominant 'understanding' of third world Africa demonstrates they have carried out nil study of the subject or that they are lying to themselves.

In an excellent paper entitled Colonial Tropes and HIV/AIDS in Africa: Sex, Disease and Race, authors Adrian Flint and Vernon Hewitt impassively lay out a cross-section of the reams of false propaganda written about Africa by first world visitors over the decades which they say has shaped first world white man's entire understanding of this continent. Trope means a metaphor or a significant recurring theme. The authors begin by examining how we 'over here' imagined the dire state of Africa and Africans as reports came through of a syphilis pandemic 'ravaging' Africa in the late 19<sup>th</sup> century. They compared 'how we felt' back then with 'how we felt' 100 years later as the reports began trickling through of an AIDS pandemic 'ravaging' Africa.

Without doubt, say Flint and Hewitt, what has been sown deep into the white supremacist mindset is the view *'... that African people needed saving from themselves. By analysing historical responses to these two pandemics, we demonstrate an arguably unbroken outsider perception of African sexuality,*

*based largely on colonial-era tropes, that portrays African people as over-sexed, uncontrolled in their appetites, promiscuous, impervious to risk and thus agents of their own misfortune.*

*The view of Africa as 'unhealthy' has also been lasting. Once again, it can be argued, this is a perception that, in the West, has shown considerable durability. In many respects, there has been little adjustment to the colonial idea of Africa as a place - and, moreover, source - of disease. As imperial penetration morphed into colonial administration, authorities came to glory in the transformative ability of Enlightenment science: biomedicine, it was argued, could play a key role in the 'upliftment' of a continent viewed increasingly as being weighed down by disease-exacerbated isolation and poverty.'*

And to be a supremacist doesn't mean you need to be robbed in the full KKK outfit to be inducted. Supremacist - meaning: a person who believes a particular group, especially one determined by race, religion, or sex, is superior and should therefore dominate society. The supremacist algorithm is simple. Any time ANYBODY refers to themselves as living in the first world or considers a continent to be third world, you are a supremacist. Lord, please forgive us our first world supremacist trespasses.

Flint and Hewitt's paper is an excellently written indictment of our propagandised first world attitudes towards Africa. As far as African AIDS was concerned, we absolutely believed Africa needed saving from itself, and consequently, across an entire continent, disparate and often desperate

communities needing only mosquito nets, clean water, basic accommodation and wanting only self-governance, were descended upon by meddling, deceiving white first world angels plus hordes of the white and well-intended who force-tested the local populations with fake HIV tests and filled and killed them with AZT and its derivatives.

Africans themselves of course would ask no difficult questions of the kings' 'AIDS medicines' or of the WHO, BMGF, UN social re-engineering programmes that accompanied their 'AIDS health drives'. At ground level, the majority of Africans were like wide-eyed unsuspecting rabbits dazzled by the great white knight AIDS headlights. South Africa Prime Minister at the time Thabo Mbeki did his best to bring world attention to the kings' evil practices but to no avail. Madame Mainstream gave him no space WHATSOEVER to air his concerns. Amazingly however, and only God knows how, the British Medical Journal gave some room to an article stating there is no HIV crisis in Africa and that it's all about [the sale and distribution of toxic drugs](#).

## THE CONSEQUENCES OF WANTING TO 'HELP' AFRICA

In all the AIDS hullabaloo, African townships and rural communities would once again simply trust the 'good intentions' of the white angels. Below, we see how first world AIDS influence was creeping in to every corner of Africa. Anybody and everybody could be harboring killer HIV, everybody could be HIV asymptomatic, and everybody was told it was their social and moral duty to know their HIV status. And the great news for Africa was that Burroughs-Wellcome (by then Glaxo-Wellcome) had at last caved in to all the evil tennis pressure and had generously lowered the costs of her life-saving drugs for Africa!

And so now, it was a matter of looking to naive charities and churches to work alongside the kings of the earth to join the valiant AIDS fight and help distribute 'life-saving' AIDS tests, drugs and condoms and first world 'sex advice' across the African populations. But who would answer the glorious first world call? Who would step up to go help ignorant, promiscuous, disease-ridden Africa? Right, we see a standard roadside poster in Ghana

And in reply to the call-up, thousands of willing souls across church universal stepped forward to join the great white AIDS crusade! Churches and church organisations large and small who had wholeheartedly embraced the false 'infectious AIDS' narrative were now keen to organise local bucket shakes, bring and buy and raffles to raise the money to fly out their own to Africa to 'help show these poor unfortunates the way out of their largely self-induced HIV plight'. And we don't think we're supremacist?

Kind-hearted first world souls who wouldn't think for a minute there was any other agenda at work (because church universal never opens the darker box) were heading off for the steaming jungles with full prayer and financial backing from their home churches plus suitcases filled with condoms, fake HIV tests and colonial safe sex advice. Ugh! Our first world 'help' doesn't bear thinking about.

And so I thank God for the horrible privilege now of taking us all to this 'unsafe space', so we might comprehend the FULL cringeworthiness and terrifying nature of our white knight AIDS church crusades.

Cringeworthy in that as we descended upon hundreds and hundreds of towns and villages across Africa to help deliver our Johnson and Johnson condoms and safer-sex pamphlets, and all of our reasoning for doing so built on the false 'infectious AIDS' narrative. And just as cringeworthy, all of our 'christian outreach' was delivered in the nicest, naivest, most supremacist, un-supremacist, racist, un-racist, morally superior, gentle, chiding patronising church way! Ugh!

And terrifying in that as we earnestly prayed for the villagers as they got thinner and thinner and sicker and sicker, we had no idea it was our fake HIV test and poisonous AIDS drugs that were doing all the damage.

Naive but well-intentioned church universal achieved NOTHING AT ALL in her sterling AIDS work except a) to reinforce the false 'infectious AIDS' narrative and b) to lend a benevolent face to the malevolent kings of the earth. Church universal gave luciferian population control the kindly, caring face Big Pharma never could. Enlisting the support of smiley, friendly, naive church universal enabled the evil kings to continue with their evil population control agenda with nil interruption.

### **AND AS A RESULT OF REFUSING TO ENGAGE WITH THE REAL WORLD**

Church universal wasn't intentionally helping to further these luciferian ends of course. Well-intentioned church universal never does *intentionally* help the kings of the earth in whatever universal health deceit church universal is deceived into believing and supporting, and there have been many. And now King Kong c19 has been added to the depressingly long list of Big Pharma fakery that church universal has swallowed hook, line and sinker. Here's the current Christian Aid AIDS advice, '*HIV is a virus. It is important to follow safer practices, which can include correct and consistent condom use, abstinence and [faithfulness](#).*' Once again, kindly-thinking, gently chiding, best-intentioned first world church universal is utterly deceived.

And once again, the Church Of Good Standing has been complicit in helping our luciferian AIDS angels purely because she has never wanted to or dared to open the darker box. Church universal consistently refuses to believe such monsters exist, and as we have seen already, has refused so far to consider there are spiritually dark forces driving the latest King Kong Corona deception. And as a result of her refusal to engage with the real world, the congregations today have NIL understanding of the true heart and spirit of our luciferian rulers. And even worse for God's House right now, STILL church universal is not wanting to listen to ANY conspiratorial tittle-tattle as it's called. But for the AIDS dissenters, it's never been for want of trying to get church universal to listen wake up. Church universal has been keeping her fingers in her ears for decades on the AIDS deceit. Please let the following sink in. And it is a travesty.

## HE CERTAINLY DID UNDERSTAND THE SERIOUSNESS

Understanding the true nature of the fake AIDS/HIV crisis, I contacted several leading UK christian organisations involved in the kings' AIDS programs in order to get the relevant contrary information to the right people. I was not alone in this. AIDS dissident movements across the world were attempting to do the same, contacting the major media outlets and AIDS charities and churches in their own countries.

In talking to these UK organisations, it quickly became apparent they had no idea of the falsity of the HIV test or of the true toxicity of the AIDS drugs they were promoting or of the true intentions of the WHO/UN/BMGF depopulation program. More seriously though, what became apparent across ALL these organisations was the utter disbelief that such a 'wild fantasy' was being suggested, and neither were they interested in receiving any of the 'conspiratorial' links. One senior individual from a national christian organisation laughed out loud and asked me if I actually believed what I was saying. *'We work with the best scientific minds in the field!'* and *'Do you really think we wouldn't know about this if it were true?'* etc, etc. Ugh and shameful x 18 million!

One prominent black African leader of one leading UK church organisation did however sit down with me and he certainly DID understand the seriousness of the situation for his people. But` even as I was talking to him, I could tell the noisy Homer chant in his head was telling him this 'disruptive' contrary AIDS narrative he was now listening to would have a disastrous effect on his long-cultivated relationships with DFID and associated UK government organisations.

By the end of our meeting, this man knew beyond all doubt his evangelical organisation was allied with evil luciferian political forces and by default, his organisation was complicit in furthering Big Pharma's population control objectives under the guise of his African AIDS 'aid program'. And also, as head of the organisation, I could see he recognised his organisation had effectively been served notice on this evil. Only 5 minutes in, and he knew before God that his 'highly-praised and much-prayed-for' African AIDS program would need to undergo a complete reappraisal. In fact, if lives were to be saved, his current AIDS outreach program should cease operating WITH IMMEDIATE EFFECT.

Yet his African AIDS program continued unabated. Despite knowing that thousands of his African brothers and sisters and children and pregnant mothers and babies in the womb were intentionally being poisoned, his lips, mind and heart remained sealed. The head of this christian organisation was utterly compromised.

And so, is it any wonder our God is calling time on all of this evil IN GOD'S HOUSE? He is choosing this time to expose all of these luciferian angels of light who sit far above us and across ALL of our governments and educational establishments, and as you can now see, who also sit far above and across so many of our church Foreign Aid programmes too.

And so, it will be just the same for you, my friend. Like the evangelical leader who was given another side to the AIDS story but chose to remain allied to his government and Big Pharma and fellow church connections, you have the same choice with everything we are exposing here.

### **I WILL ALWAYS REMEMBER ONE PARTICULAR EVENING**

The main thrust of the church universal AIDS programmes petered out at roughly the same time as the fashionable red AIDS ribbon petered out. There are however many christian AIDS charities and enthusiastic churches still operating under the false AIDS narrative and busy going about their utterly deceived 'infectious AIDS' business across Africa and Asia and central Europe. And so, if after reading this you feel strongly about halting the AIDS lies and the poisonings and the fake testing - if you've caught the dissenter passion to rescue God's children from such evil, then please spend just one hour of your time at some point, forwarding this pdf file on AIDS to as many AIDS organisations as possible. Because already in late 2021/2022, WHO and BMGF and the UN and other shimmering angels are resurrecting the AIDS myth, and third world countries are once again being bombarded with first world AIDS propaganda and murderous drugs.

And we know how effective this fake AIDS pandemic propaganda is going to be in these countries. Just look out over our new King Kong Korona landscape and take in all the masks and hand gels and anti-social distancing. Are you starting to get a clearer view of our city as we climb, my friend? Are you starting to grasp the true depths of evil we're looking down upon now in OUR city? And irony of ironies, in 2016 'the man who knew' about the dangers his African brothers and sisters faced and still face today, received an award from the Archbishop of Canterbury for his 'unique contribution' in the fight against 'world injustice'.

Maybe God did speak to this man. All the information was given to him at the time, just as with all other church organisations I spoke to over the years. Maybe he did do all he could within his sphere of influence to reverse the horror of it all, and maybe the others did too. But that's between them and God. However, none of the organisations I contacted ever got back to me, and all of them, as far as I could see on their websites, continued and continue today to support the wicked angels in their despicable AIDS/HIV 'outreach' programmes. What a ghastly role church universal has played in 'the fight against AIDS. Again, ghastly - meaning: terrifyingly horrible to the senses, objectionable, frightening.

I will always remember one particular evening presenting this information to a black church congregation in West London, and it was one of the most humbling and privileged nights of my life as a dissenter for our God. The tears flowed in the congregation and in me as the ugly truths of this world were revealed. But also, in the revealing of this ugliness and exposing it to God's Liberating Light, so many people that night were set free from the evil fake HIV

curse imposed upon them by a predominantly white army of first world do-gooders and 'first world' occult leaders. And likewise today, the exact same fake worldwide fake infectious luciferian King Kong Korona curse is being fully adopted and preached and imposed upon the congregations and reinforced in the outside world by naive church universal.

And how wonderful for a black congregation to hear maybe for the first time that not all white people believe black Africa is promiscuous, to hear that not all people black or white believe Africa is cursed with an 'infectious virus' as so many Africans do because of our evil first world luciferian lies. And how wonderful for the people to hear there IS hope for those who turn their backs on the angels' murderous ideologies and look to our God to lead them.

And thank You Lord it was Your leading that made the way for a white guy to be speaking to a black congregation about the AIDS/HIV travesty, and during that evening, NOT ONCE did he tell them to wear a condom, NOT ONCE did he relay stories of promiscuous truck drivers and prostitutes and monkey sex, and NOT ONCE did he advise on getting tested or taking any of the kings' murderous drugs. Instead, he simply told the truth about our barbaric, luciferian world. And what a blessing it was for everybody there that night that he did so!

It is evenings such as this that gives God's dissenters and also the listeners such a joy. To be able to present such information to unstopped ears allows us to become prophetically excited at where our God will take us next! And this I know. Just as I witnessed the tears which came from speaking the ugly truth on the luciferian Big Pharma AIDS deception and the freedom that followed by speaking the Beautiful Truth of God's Word on these matters, our God wants His church leaders to be speaking the same ugly, FREEDOM BRINGING truths to the congregations on King Kong Korona.

And as always, we major on those Beautiful Truths that tell us how our God is our Sovereign God and so much bigger than all of the darkness! And actually, for many in the congregation that night, they instinctively knew deep down there was a deeper darkness to the African AIDS crisis, just as so many people today instinctively know there's a deeper darkness to monster Kong. All it needed was a coherent evening of joining the darker dots.

In summarising this whole devastating AIDS affair from a church point of view, aside from her commendable compassion, it was church universal's naive trust in the kings of the earth which allowed her to be drawn in to 'helping' Africa and all the other countries she visited on behalf of the kings of the earth. And like everybody else, church universal was convinced of an 'infectious AIDS crisis' not because she actually sat back and thought about the phenomenon confronting

her but because of her deep love and unquestioning worship of science and her naive belief that man couldn't possibly be that evil.

And so we've run a sword through the ugly AIDS giant now, praise God! And so when you come across any article on AIDS/HIV now, such as this 2021 piece in the 'prestigious' Lancet, you'll not be swayed as the kings continue to push on with their murderous campaign, especially [towards black people](#). And the next time you overhear a conversation about those promiscuous Africans, you'll be able to have a very different counter-conversation! The heart and hope of Smoke and Mirrors!

### **AND I TRUST YOU'RE STILL CONSUMED?**

Throughout Smoke and Mirrors, you'll have noted I've made frequent reference to satan and lucifer and how he's been instrumental in so much of the evil uncovered in these pages, and even how he inhabits the World Health Organisation, the United Nations and many other world-respected health and political institutions. But is all of this 'lucifer talk' just fundamentalist hyperbole? Where's the actual evidence for lucifer? In fact, does ANY of the evil we see in the world actually need a devil, a lucifer, a satan in the driving seat? Because there are many people who do unimaginably evil things yet make no claim to being influenced by any invisible, dark spiritual forces.

And so, whether you believe in him or not, let's now look for evidence for lucifer and even lucifer worship in our world institutions. And where better place to start than the United Nations! And what a gleaming palace of goodness it appears, the national flags all fluttering in the sun! And just read the UN homepage strapline: Peace, Dignity and Equality on a Healthy Planet. Ahhhh, that's nice! I see she's still busy though on [the AIDS programme](#), and she's still wanting to vaccinate the entire earth with the c19 vaccine, as her c19 strapline unwittingly states, '*to develop a global response that [leaves no-one behind](#)*'

Leaving no-one behind? That can be read two ways. Should we laugh or cry? And we've seen already how the UN and WHO and Bill and Melinda Gates have aided and abetted in various covert sterilisation initiatives in various countries, and so we know straight away their hearts are only evil, and the cuddly child on the UN homepage is just the usual exterior gloss. But does lucifer himself actually inhabit the United Nations?

Indeed he does! And he's even got his own little room in UN HQ in Manhattan where various luciferian agencies channel their thoughts and 'energies' to ask lucifer to guide the UN in all of her important decisions. And not only do all the UN officials know about the UN meditation room, they also endorse the activities that go on there.

And so, as we make our way over to UN headquarters now, we needn't fear what we encounter. Yes, it's frightening in places but I trust you sense lucifer's secondary position in all of this, that he has not been glorified at any point, and that it is our God Alone Who is being given all the Glory, AMEN!

And so, we keep climbing. And again, in all of this, God's dissenters are mindful that none of us is perfect, that ALL of us have fallen short. But this is my commission, my calling, and there'll be no be holding back for this dissenter. And I trust you're still consumed?
